PRODUCT CATALOGUE

THE FINISH MATTERS™

FOR PAINTERS
RotaCota
SINCE 1954

THE ROTACOTA® STORY

RotaCota® has been supplying everything from paint brushes, rollers, scrapers and equipment to Professionals and painters for over 70 years.

We know that when you're painting – The Finish Matters™.

Since starting in a Sydney garage in 1954, RotaCota has been continuously growing and innovating.

To ensure that we are supplying the best quality ranges, we regularly review our products. That's how we've thrived for the last 70 years – and we're not slowing down now.

We know painters rely on us, so we'll keep innovating and making the best possible paint tools.

ROTACOTA HERE & NOW

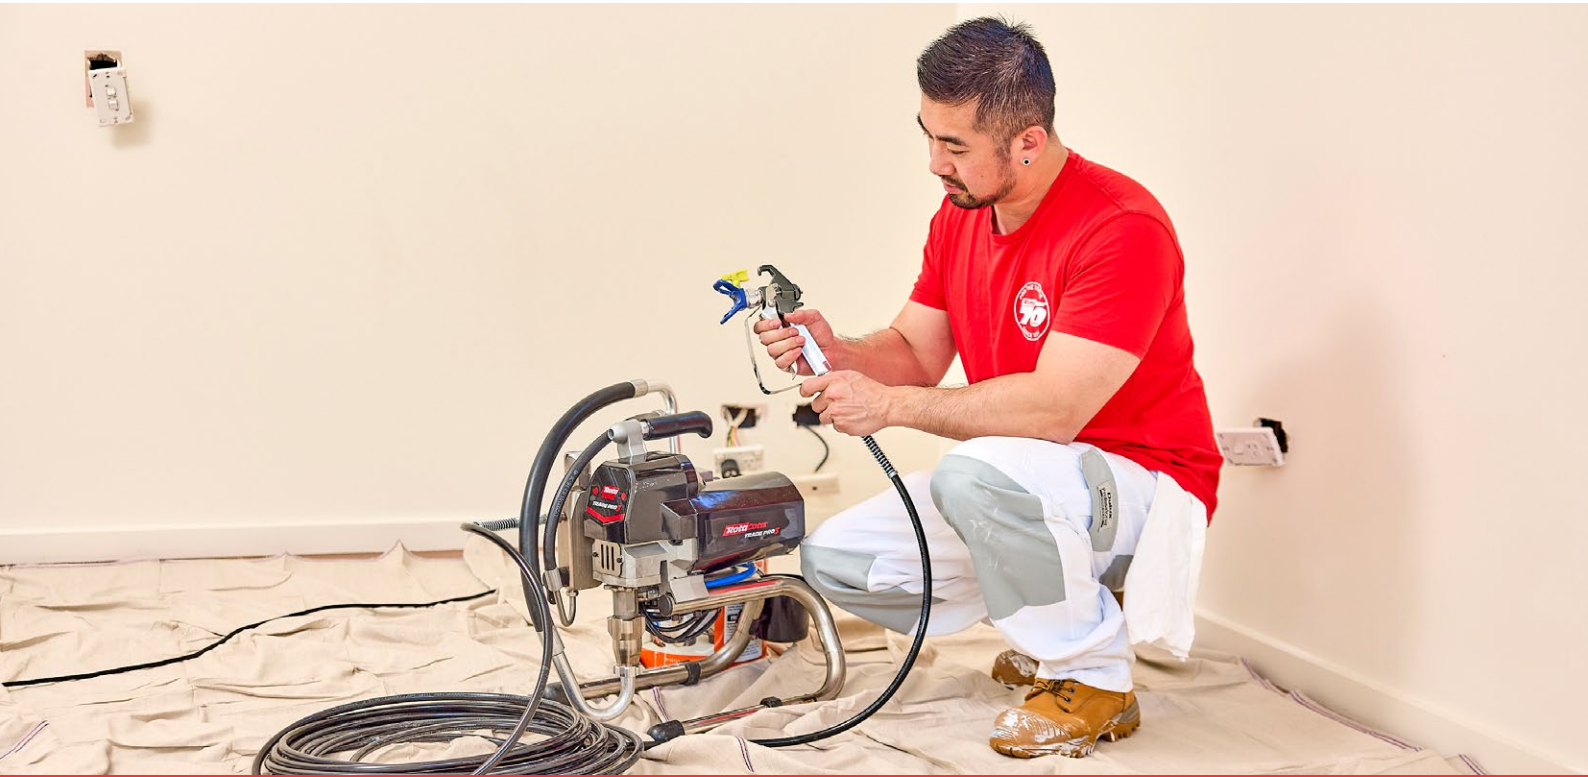

Our ranges continue to give Professional Trade and DIY painters the confidence to approach any painting project, knowing they have the right tool for the job.

We have new brushware ranges; from great all rounder brushes for various projects and DIY, to more professional Excel brushes delivering a superior finish with Glidetec® technology. We also have the innovative MaxiMini® roller covers and frames providing increased productivity, as well as offering all the classic traditional painting tools that have stood the test of time. RotaCota has something for every painting tool kit.

Our products are designed to work - and work hard - for painters that understand quality.

Amazing Rolla Cleana

The Original RotaCota® Easy Clean Rolla Cleana™ thoroughly cleans roller covers in seconds and saves water too. It uses half the amount of water compared to the conventional under-the-tap method.

Removes paint from roller covers.

- Connects onto standard garden hoses
- Tough and durable with no moving parts
- Suitable for water based paints only
- Suits Rollers up to 270mm wide
- Fits 10mm to 20mm nap length roller covers

Material	Description
N1230986-UNIT	RotaCota Easy Clean Rolla Cleana

Scan me for more product information including tips & how to video

HOW DOES IT WORK?

The RotaCota Easy Clean Rolla Cleana is designed to clean your paint roller in seconds by building up water pressure inside the tube to flush out the paint from the roller cover.

HOW TO USE THE ROLLA CLEANA

STEP 1

Do not remove roller sleeve from roller frame. Use the curved scraper lid to scrape off the excess from roller back into paint can or tray.

STEP 2

Insert roller into Rolla Cleana.

STEP 3

Lock roller frame into notch.

STEP 4

Connect the hose to snap-on connector. Hold over an empty bucket to collect waste water.

STEP 5

Turn on water supply gradually increasing to full flow.

STEP 6

Turn off water supply, unlock roller frame and remove.

TIP:

You can use the water supply pressure to eject the clean roller from the Rolla Cleana. Simply unclip the roller frame and turn on water supply. Dispose of tainted water responsibly as it is harmful to the environment.

ROTACOTA AIRLESS PAINT SPRAYER

12 MONTHS LIMITED WARRANTY

Ideal for Small Trade Projects & DIY.
